DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 26, 28-32, 34-39, 41-45 and 47-51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The new clause beginning "said resin composition containing less than 10% ..." which has been added to all of the independent claims does not find support in the specification. The location identified by applicants (i.e., page 4, lines 17-19) refers to the purity of a monoazo metal complex compound, but says nothing about a resin composition. The new clause states that the claimed resin composition may contain up to, but not including, 10% of components identified as starting materials, impurity substances and byproducts related to monoazo dyes. Support for a resin composition containing up to 10% of such substances cannot be found in the specification as filed.

Application/Control Number: 10/706,426

Art Unit: 1713

3. Claims 26, 28-32, 34-39, 41-45 and 47-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Page 3

- (a) The claims are indefinite because it cannot be determined which components are being excluded from the resin composition. The composition as a whole is unlimited with respect to additional components, except for the requirement that it contain less than 10% of components identified as starting materials, impurity substances and byproducts related to monoazo dyes. However, the prohibited components apparently relate to an entirely unspecified and unlimited process of synthesizing a dye compound, and therefore the scope of intended substances cannot be determined. The identity of the prohibited components appears to be dependent on the method used for making the dye, yet the claims are silent regarding such methods. Furthermore, it cannot be determined from the language of the claims whether components corresponding to starting materials, impurity substances and byproducts may be permitted in the overall resin composition at a level greater than 10%, provided they did not originate in the method of making the metal dye component.
- (b) The new clause beginning "said resin composition containing less than 10% ..." which has been added to each of the independent claims is not consistent with the earlier requirement that the monoazo metal complex is at least 90% pure. The claim states that the monoazo compound is at least 90% pure, but then states that the overall composition can contain up to 10% impurity. It is not understood how the overall

Art Unit: 1713

resin composition could contain as much as 10% impurity if the dye component contains only a maximum of 10% impurity.

- (c) The claims are indefinite because in each of the independent claims, the drawn structures are not sufficiently legible. Specifically, numerous superscripts cannot be read because they are illegibly blurry.
- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.

Application/Control Number: 10/706,426

Art Unit: 1713

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
